

Pure Kangen Water™

Pets Love It! Vets Love It!

Are you and your pets drinking enough water?

Proper Hydration is the key...

If a plant dries out, the leaves crack and the branches become brittle, if it doesn't get water, it will die. Give it some water and it may spring back to life. Make sure you and your pet stay hydrated and healthy. Try the Kangen Water™ 9.5 pH, it might be a very simple solution to improving the health and happiness of your entire family.

Is it coming from the tap?

Drug Traces Common in Tap Water

ASSOCIATED PRESS - Published: March 10, 2008

A vast array of pharmaceutical drugs -- including antibiotics, have been found in the drinking of over 41 million American households.

ORP is a measurement of the Oxidation Reduction Potential of a liquid. Positive numbers mean oxidizers, negative numbers are antioxidants. So the bigger the negative number the greater the antioxidant potential.

BRAND / TYPE OF WATER	pH	ORP	\$/LITER
Perrier	3.4	+457	\$3.87
Dasani	4.9	+521	\$1.89
Aquafina	5.2	+542	\$1.92
Reverse Osmosis	6.5	+586	N/A
Tap Water	7.0	+370	N/A
Kangen Water™	9.5	-470	\$0.06

<7= Acidic (Poor Health) pH7= Neutral >7= Alkaline (Better Health)

pH & ORP readings can vary from sample to sample

Charlie's Story

Charlie, is 9 years old. He's a Pit Bull Pointer mix. Over the past few years he developed a mild case of hip dysplasia, which would make him limp when he walked and he would have to steady himself to sit. He also had inflammation on the inside of his ears that we could never get under control. We started giving him Kangen Water™ 9.5 pH to drink and used the Kangen Water™ 2.5 pH water for his ears. He started showing signs of improvement after only a few days. Now, his hip is no longer a problem. He is bounding around like a puppy again and sitting takes him no effort at all. His ears look great! He's in better shape now than he's been in years. Charlie loves his Kangen Water™!

-The Kostecka's

Now you can make the healthiest water in the world for your family and your pets, right at home, instantly, anytime you want.

Dogs...

They either like it or they don't!

We all know what it's like to bring home a new toy or dog food that *we like* only to have our furry friend take one look, one sniff, then turn their nose up and walk away.

Try this... For a couple of days take 2 identical bowls, fill one with the water you've been using, fill the other with Kangen Water™ 9.5 pH, then see what happens.

A lot of dogs will take one sniff then immediately start drinking the Kangen Water™, most will love it and it will quickly become their water of choice.

Owners have noticed shinier coats and sweeter breath. Many older dogs with joint and mobility problems have more pep in their step and appear to have less pain after just a few days of drinking the 9.5 pH Kangen Water™.

As smart as we think our dogs are... There's no placebo effect here. Unlike humans, dogs don't know what they should feel. They either like the water or they don't, they either get a benefit or they don't.

Let your dog be the judge. Imagine how great it would be if something as

simple as changing their water could truly change their life, and yours.

Coco's Check-up

Our Cocker Spaniel Coco is thriving!! This 9.5 pH water has detoxified Coco's system and is helping her fight a debilitating leg problem. Every three weeks I bring her in to have her anal glands drained... now that she's drinking Kangen Water™ 9.5 pH we waited 6 weeks and when I brought Coco in for her draining the glands were empty, the vet tech was amazed.

- Patty

P.S. Coco loves her Kangen Water™ so much you can hear her slurping it up!!

Thanks to Enagic and the Leveluk SD501, more and more families are discovering that by simply changing the water they drink, they can change the way they feel.

And when way family, we mean family!

Now you can turn your ordinary tap water into healthy, high antioxidant drinking water for you and your pets.

PETS LOVE Kangen Water

Did You Know...

- Chlorine is ADDED to your tap water?
- Fluoride is ADDED to your tap water?
- Sodium Hydroxide, or Lye, is also ADDED to tap water?
- NONE of these chemicals are good for your pet to ingest!
- Even Bottled Water Is NOT GOOD For Them!!

The last time you got your pet some water, did you crack open a bottle of water or did you fill up their bowl straight from the tap? Did you know that either one of these could be harming your beloved furry companion? The bottled water is most likely very acidic, which creates a breeding ground for disease & discomfort, and the tap water is most likely loaded with chlorine, lye and other potentially harmful chemicals,

Water & Pets – What Could Be In The Water You & Your Pets Are Drinking?

All public water systems contain some level of one or more unhealthful chemicals. Regulations only require periodic testing of about 86 toxic chemicals. There are now more than 75,000 chemicals used in our society with more than 1,000 new ones being developed each year. So far, more than 2,100 toxic chemicals of the more than 75,000 patented chemical compounds in use today have been detected in America's water systems. Some of the most common toxins in tap water from the condensed EPA's safe water guidelines are listed below:

Toxin	Source	Potential Damage to Pets
Alachlor.....	Herbicide.....	Cancer, Kidney, Liver, Spleen, Nose, Eyes
Asbestos.....	Many Concrete Pipes.....	Cancers, Lung
Atrazine.....	Herbicide.....	Congestion & Heart, Lungs, Kidneys, Adrenal Glands
Benzene.....	Synthetic Hydrocarbons.....	Cancer, Chromosome Aberrations
Cadmium	Corroded Galvanized Pipes	Kidney, Liver, Bone, Blood Damage and Failure
Carbofuran.....	Insecticide	Nervous System, Reproductive System
Carbon Tetrachloride	Aerosols, refrigerant	Kidney, Liver, Nervous System Cancers
Chlordane	Insecticide	Liver, Kidney, Heart, Lungs, Spleen, Adrenal Glands
Chlorine	Water Treatment	Stomach, Kidney, Bladder Damage
Chlorobezene	Plastic Solvent.....	Nervous System, Liver, Kidney
Copper.....	Corroded Piping	Anemia
Cryptosporidium.....	Chlorine-resistant Parasite.....	Diarrhea, Cramping
Cysts.....	Chlorine-resistant capsules.....	Diarrhea, Cramping, Anemia
Endrin	Insecticide	Convulsions, Liver damage
Ethylbenzene	Plastic Solvent.....	Kidney, Liver, Nervous System Damage
Giardia	Chlorine-resistant Parasite.....	Diarrhea, Cramping
Heptachlor Epoxide	Pesticide chlordane.....	Liver, Central Nervous System damage
Lead.....	Corroded Piping	Cancer, Kidney Damage, Stroke
Lindane	Insecticide	Liver, Kidney Damage
Mercury.....	Corroded Piping	Kidney Damage
Methoxychlor.....	Insecticide	Nervous System, Liver, Kidney, Heart Damage
Ortho-Dichlorobenzene	Herbicide	Nervous System, Liver, Kidney, Blood Cell Damage
Simazine	Herbicide.....	Cancer, Kidney, Liver, Nervous System Damage
Tetrachloroethylene	Dry-Cleaning Fluid.....	Liver, Kidney, Central Nervous System Damage
Toluene	Petroleum, Paint, Solvent.....	Liver, Kidney, Central Nervous System Damage
Toxaphene	Insecticide	Cancer, Immune System Depression, Liver, Kidney Degeneration, Convulsions
Trichloroethylene	Solvent	Cancer, Liver Damage
Xylenes	Solvent, Gasoline	Liver, Kidney, Central Nervous System

Just like people, our animal companions need fresh, clean, healthy water in order to stay at the top of their game. Did you know that pets are developing debilitating and even fatal diseases and issues at an alarming rate? These include diabetes, arthritis and weight problems, just to name a few.

Here are some amazing stories:

“My 5 year old Golden Retriever named “Bow” has been a beach lover all his life. We were at the Dog Beach playing fetch with his favorite ball when he snapped his left ACL. We hobbled back to the car, straight to his Vet. We were told he would need surgery to replace the ruptured ligament. A TPLO surgery was performed. He recovered, but a limp soon followed. We got the 2 paws up to return to full activity. Back to Dog Beach we went. Within 5 minutes, “Snap” the other knee went. He had the surgery on his injured leg & again recovered. However, this time I was able to give him Kangen 8.5. He has no limp on either leg, jumps up, runs and plays hard. He has returned to Dog Beach with tail waggin, lip smackin, bright eyed excitement. Not a limp, not a whimper. I believe we owe his fast recovery to Kangen 8.5. And by the way, he had some strong acidic urine following the surgery, which burned the backyard grass. Now my grass is green and Bow is doing fantastic! Thank you Enagic for Bow’s health. He won’t drink anything but Kangen Water!!!

“Bow” Golden Retriever – Judy S. Owner

Our dog Charlie, a Pit-bull / Pointer mix, is 10 years old. Over the past few years he has developed a mild case of hip displacia, which would make him limp when he walked and have to steady himself in order to sit. He has also had severe inflammation on the inside of his ears that we could never get under control. We also noticed that the “pep” in his step was starting to fade as he got older. We started giving him the 9.5 pH water to drink and used the 2.5 pH water for his ears. He started showing amazing signs of improvement after only a few days. Now, his hip is no longer a problem. He is bounding around like a puppy again and sitting takes him no effort at all. His ears look great! He is in better shape now than he has ever been!! And the only change we made was the water we gave to Charlie. Thanks Enagic, the Kangen Water gave us our puppy back! **“Charlie” Pitbull / Pointer – Gerald K. Owner**

Our Cocker Spaniel’s are thriving !!!! They have both been on Kangen 8.5 for several months and their health has noticeably improved. Coco’s Mom Patty makes a broth from the Kangen Water and Coco loves it. One day Coco’s Mom Patty ran out of the Kangen and she purchased some Arrowhead and Coco turned up her nose and wouldn’t drink it. Coco has been Patty’s cocker spaniel for 12 years and every three weeks has had her anal glands drained...this past time she went 6 weeks and brought Coco in for her draining and the glands were empty. This water has detoxified Coco’s system and is helping her fight a debilitating leg problem. Penny, on the other hand, is not as sophisticated as Coco in her tastes. However, I have had Penny on Kangen water for several months and I make her Coco’s Canine Cuisine with only the 8.5 Kangen and cook her chicken in the 8.5 Kangen Water and it has been so tasty for her, that she used eat like a bird and now eats like a dog!!! Her anal glands were impacted two months ago and I was scheduled to get them drained every three weeks and we went in and the Vet. Tech. said her anal glands were empty as well...we are AMAZED at the benefits of this Kangen Water for our cocker’s!!!

“Coco” & “Penny” Cocker Spaniels – Patty & Janet Owners

Many pets are finding relief to their problems by drinking Kangen Water™. If you have a pet that could use a boost in energy or has a condition that has their tail wagging a little bit less, get some FREE samples of Kangen Water and see if it helps them out. Otherwise, man’s best friend might have to reevaluate just who his best friend really is!
