

I have a wonderful story I would like to share with you. I just spoke with Larry Morris in Florida. His nephew talked him into buying an Enagic SD501 for his sister who had Parkinson's disease on the chance that drinking the water might help her. They had already spent a great deal of money exploring medical possibilities with no results. At first they had a hard time getting her to drink the water. Then they got her to drink about a gallon a day. After 3-4 weeks she was able to communicate intelligibly on the phone for the first time in 12 years.

Now, 2 months later, it is not apparent that she has Parkinson's. She has almost no symptoms and is not shaking. Based on the results, Larry became a distributor.

A woman in her 40's came up to Larry at a recent meeting and told him she had also had Parkinson's. She had been drinking the water for 3 months and was clearly symptom free. Her husband was extremely happy.

Larry's own testimony is that, due to exposure to the Florida sun he has been dealing with on-going problems with skin cancer, having 15-20 spots removed on a regular basis. He has been drinking the alkaline water and regularly washing his face and bald head with the acidic water, alternating between strong acidic water, pH 2.5 and the Beauty Water, pH 4.5. The last time he went to the doctor, he only had one spot that needed to be removed. Yipee!

Larry said it is o.k. to contact him if you have any questions about the above.
