

What's the big deal about water?

Water is the foundation of life. Only oxygen is craved by the body more than water.

Water is the basis for all body fluids—including blood, lymph, and digestive fluids.

Water helps convert food into energy.

Without water, cells cannot grow, reproduce or survive, and the entire organism dies.

Water lubricates and cushions joints.

Water movement, into and out of cells, produces a significant amount of energy—that's why one of the first symptoms of dehydration is often fatigue.

Water regulates body temperature.

Water moistens tissues such as those in the mouth, eyes and nose.

Water protects and hydrates vital organs.

Water carries nutrients and oxygen to cells.

Water helps prevent constipation.

Water helps the body absorb nutrients.

Water removes toxins and waste.

The body can survive for weeks without food, but only a few days without water.

Introducing Kangen Water®

Kangen Water® is the delicious, healthy water created from Enagic's innovative water technology. Not only do these amazing devices filter harmful chemicals out of tap water, but they also produce Kangen and acidic waters through the process of ionization. These water types can be used for various purposes, including drinking, cooking, beauty, and cleaning. The word "Kangen" in Japanese can be best translated as "return to origin."

Kangen Water® has three distinct properties:

Anti-oxidizing (Detoxifying)

Kangen Water® is a potent antioxidant. Infused with free electrons, it slows the oxidation (aging) of healthy tissues by free radicals (oxidation in the body is like when a cut apple turns brown).

Alkalizing (Disease Fighting)

Kangen Water® is oxygenated and has an alkaline pH. This neutralizes acid wastes, removes toxins and brings the body back into natural balance which boosts the immune system.

Micro-Clustered (Super-Hydrating)

Kangen Water® molecular cluster size is smaller and six-sided which increases your body's ability to utilize important nutrients and to eliminate acidic waste.

**Your Body Needs Water!
Give It The Best Water!**
